CM200V Intelligent Banknote Sorting Machine

Innovative cash sorting technology from GRGBanking:

CM200V is the ideal cash counting and sorting solution for banks, retails and CITs.

Precise Cash Processing

- Featured with **professional and comprehensive banknote authentication technology** which supports IR, UV, magnetic, thickness detection and CIS (contact image sensor), CM200V is able to detect soiled, stained, taped, torn and dog-eared notes.
- The **OCR technology (opt.)** realizes the capability of serial number tracking on CM200V, the serial number can be recorded in the PC, and both sides' image of each note will be kept on an optional image recorder.

Optimum User Experience

- 5-inch touch screen plus function keys** facilitate user's operation on the machine.
- High brightness digital display** indicates the banknote number in the stacker.
- With **non-stop operation hopper**, user can keep feeding the notes.
- The **USB, RS-232 and LAN interface** extend the connectivity of CM200V, so it can be connected with external LCD, printer and PC for sorting report checking, printing and upgrade, to realize centralized management.

Easy Maintenance

- Easy access to the banknote transport to remove jammed notes and conduct cleaning
- The dust generated during cash processing will be automatically collected by the dust box
- Support remote updating and diagnosis
